NAME Rory Conolly	DESCRIPTION The International Dose Effect Alliance (IDEA) Workshop an initial formation workshop to explore the opportunities and interest in national and international collaboration on Low Dose Radiation Effects Research. Low Radiation Dose continues to be a significant issue, and there is a need for a framework and platform to facilitate communication and collaboration on low dose radiation research programs within the United States, and with international partners. The vision for IDEA is for an international platform for information exchange, discussion, cooperation, and collaboration in low dose radiation research. The mission is to facilitate information exchange and collaboration on low dose radiation research programs, identify issues, areas of synergy, and opportunities for additional research, and foster	LOCATION Charlotte, NC	Electric Power Research Institute (EPRI)	Meals Lodging Other: POV round-trip Chapel Hill - Charlotte	X X X	X	\$146.25 \$137.15 \$140.40

	integrated, outcome oriented approaches to resolve low dose risk. Dr. Conolly has been asked to provide an overview of EPA research on the development of adverse outcome pathways (AOPs) and quantitative AOPs, as it is thought that this research may be relevant to health effect concerns related to generation of electricity, particularly ionizing radiation associated with nuclear power plants. Dr. Conolly has worked on quantitative AOPs for over 10 years while at EPA.

Jack Faulk	Speak and participate in an event (4th Ballast Water Management Summit) with approximately 100-150 vessel ballast water management stakeholders to discuss EPA's NPDES Vessel General Permit (VGP) and the relationship of that permit to other ballast water management activities going on around the world. Other participants will include the U.S. Coast Guard, US. Naval Research Lab, and stakeholders with an interest in ballast water management science, control technologies, monitoring, and regulations. EPA's participation at this conference is important in disseminating regulatory requirements to a host of stakeholders, including a number of foreign entities to whom our requirements also apply. This conference historically attracts many of the world leaders in ballast water management which provides an important venue for EPA to educate affected stakeholders worldwide. NAME Vasu Kilaru	DESCRIPTION workshop which will address "Critical issues in air pollution monitoring in regions with existing stationary monitoring networks." questions we want to touch on include: 1. What are the challenges & opportunities in integrating pollution measurements from various technology groups (satellite, low-cost portable, stationary, modeled data, etc.) in ways that are useful for health research and patient care? 2. In what ways would integration of air pollution data collected from low-cost portable monitors be improved through standardization of data formats, protocols, etc.? 3. What are the near-term opportunities	LOCATION Washington, DC	The American Thoracic Society (ATS)	Common carrier transportation Meals Lodging		X X X	\$195 \$30 \$309

for improving measurements of short-lived ambient pollutants through integration of monitoring data from various technology groups?
 4. What are the potential pitfalls for health research and patient care if we fail to effectively integrate air pollution data from multiple technology groups?

	DESCRIPTION/SPONSOR/DATES		SOURCE	DESCRIPTION	CHECK	IN-KIND	AMOUNT
NAME Charles Wood	DESCRIPTION The primary purpose of this trip is for Dr. Wood to participate as a speaker/panelist at the Education Symposium for the ACVP/ASCP Annual Meeting. The secondary purpose is for Dr. Wood to gain insights from other toxicologic pathologists related to the evaluation of adverse effects in investigative and guideline-type studies. Pathologic findings are the basis for many of the assessments conducted at EPA for environmental chemicals, air pollutants, and water contaminants. Determination of whether a particular test article effect is adverse or not is a critical part of the risk assessment process but one that is not well-standardized across different organizations. This meeting will support Dr. Wood's roles as a pathology advisor to EPA program offices and an investigator in the CSS research program.
